

Line-of-Sight Technical Working Group

**You are being invited to attend
the first meeting of the
Topographic Engineering Center
sponsored Line-of-Sight Technical
Working Group (LOS TWG).**

**The meeting has been scheduled
for Thursday June 5th, 2003 at
the US Army Corps of Engineers
Topographic Engineering Center
in Alexandria, Virginia.**

For more information send an e-mail to rbinfo@tec.army.mil

Our goal is to create a group that will:

- **Provide standard reference data and processes for testing GOTS/COTS LOS application software.**
- **Produce a living document detailing different approaches to LOS and their tradeoffs based on the requirements of the project.**
- **Improve on existing methodology used to field-validate LOS algorithms and build upon current LOS body of knowledge.**
- **Identify LOS algorithms which are best in certain situations based on the requirements of the project.**
- **Provide a primer which introduces all of the things to consider when developing/ implementing revised/new algorithms.**
- **Keep track of R&D efforts worldwide that affect LOS issues via an annual workshop.**
